Dear Sir,

APPLICATION FOR THE PART TIME JOB AS A WEBSITE DESGINER AND DEVELOPER

I am interested and I would like to apply for the part time job to design and develop a website for the Mission as required. I have knowledge and skills in designing and developing a website using the following languages or tools: CSS, Bootstrap, PHP and little of JavaScript which I learned in my second year in a Web development course. With the skills I have in the stated languages, I aim at developing a fast and responsive webpage. In my second year of my Bachelors, I managed to develop an online shop on which users were able to create an account, view, select items from the shop and they were able to put items on the cart and the admin was able to remove and add new items into the shop. Although the users were not able to purchase with the use of mobile money platforms, but the system was fully functional.

Here are my contact details for any update from you; mafeniblessed@gmail.com, +265882992942.

I would be glad if you give me the chance to work and be part of the development team.

Yours Faithfully,

Vitumbiko Mafeni.
